PRE-ANESTHETIC CONSENT FORM

Like you, our greatest concern is the well-being of your pet. Before putting your pet under anesthesia, we will perform a full physical examination. However, many conditions (including disorders of the liver, kidneys, or blood) are not detected unless blood testing is performed. Such tests are especially important before any kind of surgery.

For these reasons, we highly recommend blood screening before such procedures.
The total cost of these important tests is: ** Call for price

In addition to blood testing to check your pet's health, we recommend an EKG to help us identify heart irregularities and detect or avoid certain sedatives/anesthetics that could cause complications during routine procedures.
The total cost of this important test is: ** Call for price

Our hospital also offers laser surgery which helps seal blood vessels and nerve endings. This helps reduce blood loss, swelling, and post-operative pain for your pet.
The total cost of this important option is: ** Call for price

Our hospital also offers microchipping which may be conveniently done while your pet is anesthetized. Does not include Home Again registration fee.
The total cost of this important procedure is: ** Call for price

Supplemental pain management will be sent with most of our surgical patients. The cost varies among pet sizes and species.

Our laboratory is fully equipped and staffed to perform these important tests. Results will be immediately available to examine before anesthesia and/or surgery. Please indicate your choices below:

Pet's Name: _____

☐ **YES** ☐ **NO** I want my pet to have a pre-anesthesia **BLOOD SCREEN**

☐ **YES** ☐ **NO** I want my pet to have **LASER SURGERY**

☐ **YES** ☐ NO I want my pet to have a pre-anesthesia **EKG**

☐ **YES** ☐ NO I want my pet to be **MICROCHIPPED**
